In only one hour the water storage system is disinfected, and without rinsing, is ready for immediate use.

Water Storage Systems

To Disinfect Potable Water Storage Tanks

General Information:

It is a violation of Federal Law to use this product in a manner inconsistent with it's labeling.

DIRECTIONS FOR USE

- FOLLOW INSTRUCTIONS**
- Place 1/3 fl. oz. 3R PUROGENE per gallon of tank capacity (50 ppm) into a clean plastic container. To this solution, add 1/8 fl. oz. lemon juice (per batch) and allow to react for five (5) minutes. Pour activated concentrate into tank and fill up tank with clean, potable water.
- Drain a small amount of disinfectant solution from all outlets.
- Allow disinfectant solution to stand for one (1) hour.
- After one (1) hour, drain tank and lines. Tank is now disinfected and ready for immediate use.
- Refill tank with fresh potable water.
- Repeat above procedure as often as necessary.

**1 oz. Purifies
30 Gallons of Water**

Once Disinfected, addition of Purogene to water to purify, maintains tank at same time.

TIME SAVER: No need to rinse after disinfecting the water system. It is ready for immediate use.

Water Treatment

To Control Build-up Of Slime And Odor Causing Bacteria And Enhance The Taste Of Stored Potable Water.

DIRECTIONS FOR USE

- FOLLOW INSTRUCTIONS**
- Potable water should be treated at a rate of one (1) fl. oz. 3R PUROGENE per 30 gallons of potable water (5 ppm).
- This treatment will provide fresh taste and odor control to potable water.
- Treat each new addition of potable water to the fresh water tank at the ratio of 1 fl. oz. 3R PUROGENE per 30 gallons potable water. Treat as often as necessary to maintain fresh taste and odor control.

CAUTION

Industrial Concentrate: If taken internally, flush with water and consult a physician. In case of skin or eye contact, rinse affected area thoroughly with water. If irritation persists, contact a physician.

Storage and Disposal: Store in a cool, well ventilated area away from direct sunlight., in case of spill, flood with water before discarding to drain. Avoid contact with strong acids and bleaches.
